

MI 39-23B

MI 39-23B is an innovative machine with lithium battery onboard for deep cleaning / cleaning and treatment of all types of floors. Made with noble materials such as Aisi 304, anodized and perforated aluminum base, Torx screws, anti-vibration parts resistant to high temperatures and high loads, superelastic wheels. The motor and the electrical parts have IP55 protection class.

MICROIMPLUSLE TECHNOLOGY (technology supported by the design of the machine) is an exclusive system, derived from an engineering idea developed in Italy, which, by creating strong turbulence, is able to remove any type of dirt from the floor without that the User feel operation vibrations or physical exertion.

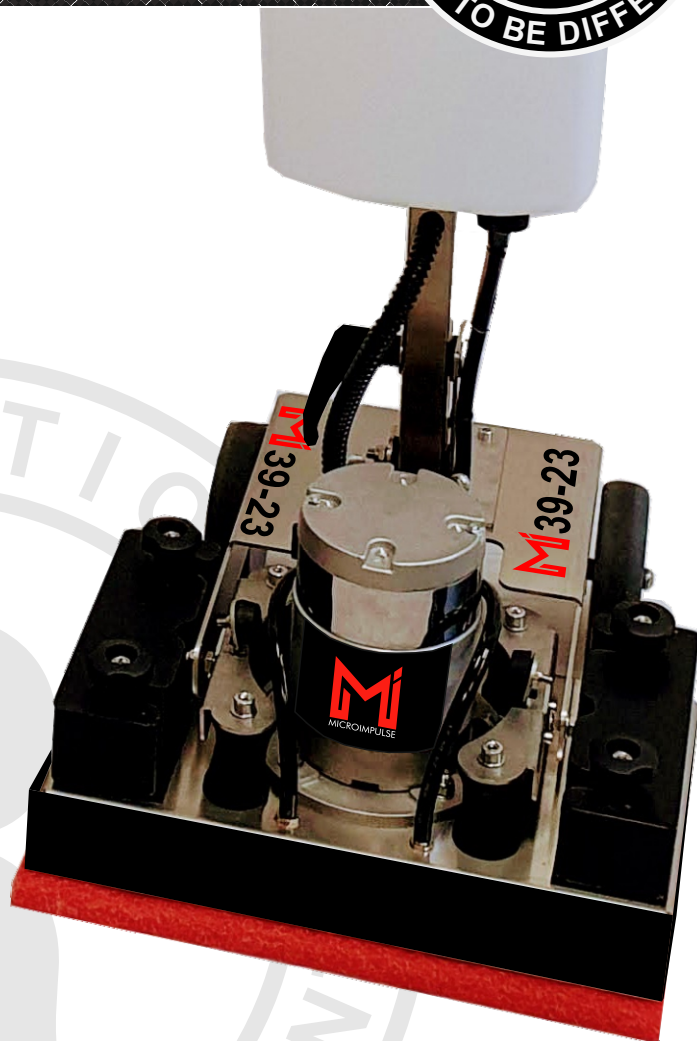

ADVANTAGES OF THE MI 39-23B

VERSATILE - The machine is fast and versatile both in the working phase and in the transport phase, despite weighing over 30 kg. With the Lithium battery onboard can work for 2 hours.

ERGONOMIC - Thanks to the perfect balance and the exclusive anti-vibration damper, the operator can operate the machine very easily.

POWERFUL - The unique 2800 rpm motor with the innovative eccentric creates a very strong washing effect. Even the most stubborn dirt is removed effortlessly.

ECONOMIC - Reduces working hours by 50% and saves water and chemicals.

TECHNICAL FEATURES

Motor power:	250 Watt
Voltage:	36V
Rotation :	2800 rpm
Motor height:	25 cm
Work surface:	39cm x 23cm
Weight:	Kg 30
Noise level:	60dB
Tank capacity:	8 Lt.
Handle height from the ground:	110cm
Battery run time:	2 H
Charger:	36V/3Ah
Lithium battery	36V/12,8 Ah
Protection class:	Ip55
Certification:	CE

Lithium Battery
